

ExpertCare Services

CLS

ExpertCare provides CLS services to those who are working on goals to reach their potential. CLS is provided to people of all ages. ExpertCare is dedicated to providing quality caregivers who are committed to helping the individual reach the goals in their plan of service.

ExpertCare's core purpose is "Helping People Succeed". The services offered in this program help the person served succeed in living the life they want by supporting and implementing the plan in which the person served stated his/her goals and the help they need to overcome the obstacles in their path. The goals that ExpertCare supports to help the person served are: meal preparation, laundry, household chores, activities of daily living, shopping for food and other necessities, money management, non-medical care, socialization and relationship building, participation in regular community activities, attendance at medical appointments, and preserving health and safety.

CLS is available to those who qualify for these services through their Community Mental Health Organization (CMH) in Oakland, Macomb, Wayne, and Genesee County. The frequency of the services is dependent on the services outlined in the Plan of Service created by the CMH during a person centered planning meeting.

ExpertCare Services are available 7 days a week, 24 hours a day.
